3DISC OVO Intraoral Scanner

OVO is the combination of 3 technologies:

2D camera, 3D scanner and the Scan&Tell communication hub.

3DISC Scan&Tell suite comes equipped with Preliminary examination, buccal monitoring and smile design, helping you monitor patient evolution over time and plan treatments. Equipped with a tablet and 3DISC Scan&Tell, the dentist can show and explain options to the patient to increase treatment acceptance rate.

OVO also includes the state-of-the-art AI scanner tool 3DISC fly-AI™. 3DISC fly-AI™ is a new AI-based algorithm, developed to automatically detect and eliminate soft tissue and foreign objects in the patient's mouth. This makes scanning easier and faster for all users.

Includes 1-1 training and special offer.

3DISC HERON IOS

3DISC's proven innovative technology, enhanced by its ergonomic and lightweight scanner, provides stability during the scanning, allowing for constant precision. Its "2 click to start, 2 minutes to scan, 2 seconds to check" method helps the dentist start their day quickly and focus more on the patient. The 20mm scan depth will help you tackle low ridges and other more complicated scan areas.

HERON also includes the state-of-the-art AI scanner tool 3DISC fly-AI™. 3DISC fly-AI™ is a new AI-based algorithm, developed to automatically detect and eliminate soft tissue and foreign objects in the patient's mouth. This makes scanning easier and faster for all users.

Includes 1-1 training and special offer.

Smile Lite MDP2 Master Set

The Smile Lite MDP2 is a plug & play device that is easy to use, doesn't need a special App, calibration process or specific training. When making the comparison with traditional photography with an SLR (single lens reflex) camera, the Smile Lite MDP2 can be described as a mini photo-studio and will allow you to drastically improve your photographic results with the camera on your smart phone.

- Photos for shade taking
- Every day communication with the lab
- Communication with patients
- Short video clips
- Patients' documentation
- Artistic pictures

It is equipped with three groups of LEDs, each group can be lit up individually. A dimmer function allows you to set four different levels of illumination.

Product code: 6700-Master

£519

(All prices exclude VAT and carriage. E & OE)

Nu:le Coat Stain & Glaze System

For fast, efficient chairside application, a high performance, abrasion resistant, Japanese material with a rich colour line up, and low viscosity that allows for a thin and uniform application.

- Low viscosity design prevents brush marks.
- With a low curing strain, cracks and lifting are less likely to occur even when the film becomes thicker with repeated coatings.
- Tested up to 50,000 tooth brushing cycles.
- For use with direct and in-direct composite materials

Perfect match for:

- Traditional dentures
- Milled dentures
- Pressed dentures
- Printed dentures
- Adding glaze after intraoral adjustments
